SAY
SAY CARBON YACHTS

Feel the sensation. Experience a unique - sportscar-like - acceleration...

The SAY 29 – like all our models – is engineered and manufactured with the latest technique in Germany. The result: An ultra-light-weight yacht that extends range, while lowering fuel consumption.

Discover the highest level of craftsmanship on board and below deck, combined with the latest technology for the absolute driving pleasure in unique SAY style.

For those who expect more: When carbon specialists show their skills. Let yourself be impressed by the visible carbon parts on board the SAY 29 and experience our passion for details.

SUSTAINABLE ADVANCED YACHTS

SAY CARBON YACHTS

The high design and quality standards are achieved at the modern SAY shipyard in Wangen – in the Allgäu region of southern Germany near Lake Constance – with the ultimate engineering standards and the passion for details. We have created an avant-garde yachting experience that is not for everyone - but for those who want to explore the feeling of Low Emission boating with uncompromising design and performance.

Every detail on the SAY 29 is optimized for speed and agility, all components are perfectly matched.

HIGH EFFICIENCY - LOW EMISSION YACHTING

SAY demonstrating how we can reduce our carbon footprint and remain with a stylish, modern and luxury boating lifestyle without restricting performance.

As **Pioneers of Lightness**, we show how the use of carbon fiber can be used to create innovative motor yachts.

“Our expertise in lightweight constructions enables us to achieve a unique combination of acceleration, design and agility, while lowering fuel consumption.”

(Karl Wagner, CEO)

ELECTRIFYING YACHTING

Experience the advantages of electric boating with our SAY 29 E and be part of our pioneering mission to electrifying yachting: Enjoy silent, exemplary boating.

THE GERMAN TECHNOLOGICALLY ADVANCED MANUFACTURER FOR CARBON BUILT LUXURIOUS YACHTS

SAY Carbon Yachts are manufactured to be efficient, 50% lighter than most comparable models. Therefore, we are reducing emissions and burning 50% less fuel at cruising speed (20 knots).

HIGH EFFICIENCY - LOW EMISSION YACHTING

SAY - PIONEERS OF LIGHTNESS

OUR VALUES

- High efficiency - Low Emission Yachting
- Light weight - Based on a carbon monocoque structure
- Best performance - Outstanding acceleration rates
- Iconic design - The distinctive appearance compliments the inimitable driving behaviour
- High tech - Engineered and manufactured in Germany

The custom wave cutting bow design combined with stability side wings on the bathing platform ensures maximum steadiness while enabling incredible cornering speeds.

SAY Carbon Yachts constructs stylish Sustainable Advanced Yachts with hulls made of 100% carbon fiber.

This makes all vessels fast, solid and economical.

SAY uses reliable standard fibers from classes T300 and T700 with individual layer weighs between 200 and 800 grams. Moreover, each manufactured carbon-part goes through a comprehensive stress calculation – so every SAY Carbon Yacht is optimised to the last detail.

SAY Carbon Yachts designed a unique hydrodynamic "wave cutting" bow to ensure a comfortable and dry driving experience

SAY 29 E

LEADING ELECTRIFYING YACHTING

ENJOY THE SILENCE...

It's not the future, it's the present: Enjoy electric silent boating on the water in SAY style!

The innovative technology provided by the E-Mobility pioneers in Europe - Krieselectric - provides the SAY 29 E with a cruising range of approx. 25 NM at 22 knots.

Equipped with 126kWh (2x 63kWh) and Charging Type 2 (AC) 22kW with optional CCS (DC) 120 kW, the SAY 29 E guarantees the ultimate electric experience with unexpected acceleration.

BEST PERFORMANCE – OUTSTANDING ACCELERATION RATES

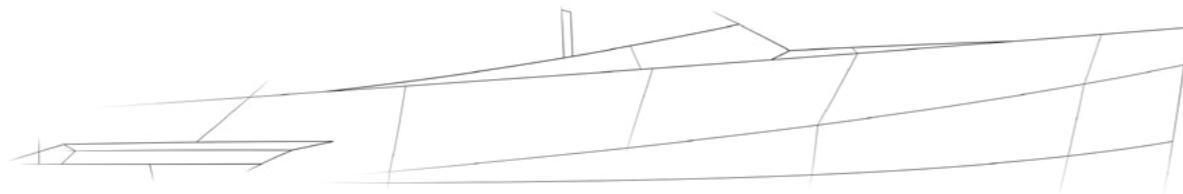

FOR THOSE WHO EXPECT MORE

Carbon is a unique high strength material. Its low weight creates a more efficient world.

Composite materials like carbon fiber are one of the most distinctive elements of our sports car on water, the **SAY 29**.

As a result, we combine many positive characteristics that guarantee you a unique driving experience:

1. Due to the light weight (from 1,38 tones), you accelerate up to 50 knots in seconds
2. In combination with the certified ultra-low emission Volvo Penta engine, you will emit 50% less emission
3. You use much less fuel and can enjoy boating - and spend your money on more important things

PRINCIPAL DIMENSIONS

Lenght overall	8.85 m
Beam	2.78 m
Draft	81 cm (90 cm SAY 29 E)
Dry weight	1.38 tonnes / 1.9 tonnes (with Volvo Penta engine) (SAY 29 E)
Fuel capacity	300 litres (126 kWh SAY 29 E)
Water capacity (incl. calorifier)	35 litres
Maximum capacity	6 passengers
CE category	C
Hull structure	Carbon fiber epoxy sandwich

PROPULSION OPTION

- Volvo Penta V8 - 380-CE dps, 6.2l 380 HP including aquamatic duo-prop drive
- Volvo Penta V8 - 430-CE dps, 6.2l 430 HP including aquamatic duo-prop drive

ELECTRIC OPTION

- SAY E-Drive Powertrain with 126 kWh, 325 HP continuous power and 615 HP peak performance

FEEL THE SENSATION ON BOARD OUR SAY 29

Each SAY Carbon Yacht is a carbon masterpiece designed to the customer's vision.

To offer the highest comfort, we only use luxurious materials combined with visible carbon parts creating an eye-catching and haptic impression.

ICONIC DESIGN

Engineered and manufactured by carbon specialists in Germany. To guarantee quality to level only previously seen in the automotive world, we keep as much as possible in-house. Each customer will have the opportunity to be present during the entire production process. From the construction of hull and deck through the painting process until the final assembly.

OUR PROMISE AT SAY CARBON YACHT

To live up to our vision of being the most innovative shipyard, we employ a team of engineers who are constantly working on improvements and new techniques. The design of our models is also created by well-known German car designers.

The result: high user-friendliness and state-of-the-art technology. A unique hydrodynamic wave cutting bow for comfortable and dry handling characteristics even in rough conditions, stable side wings that guarantee maximum stability even at incredible cornering speeds, lightweight carbon hull for breath-taking accelerations.
